

Where the Water Flows, Kylee Neale

Water gives life, the essence of cells;
Essential element to make us ourselves.

Water gives energy, the rushing of waves;
Perpetually turning underwater turbine blades.

Water gives power, manipulated by those;
Great dams and oil drilling which only grows.

Water gives suffering, floods, spillage and contamination;
The disasters which occur in every nation.

Water gives potential, invigorating our souls;
Pushing us to care and love to HIS goals.

Water is peace, a slow burn in the wood;
Reminding us to appreciate this world as we should.
